```python
import re

def clean_text(text):
  text = text.lower()
  text = re.sub(r"[^\w\s]", "", text)
  return text
input_text = "Hello, World! Welcome to NLP 101"
cleaned_text = clean_text(input_text)
```

```python
print("Original text:", input_text)
print("Cleaned text:", cleaned_text)
```

    Original text: Hello, World! Welcome to NLP 101
    Cleaned text: hello world welcome to nlp 101
